Hands - On Modal Testing Seminar

Have You Tested JimBeam ?

Nov 2 - 5, 2010 (Fullerton, CA)

Navcon Engineering, Fullerton, CA is pleased to announce the November 2010 Hands-On Modal Testing Seminar. It is our goal, that upon completing the class, attendees will be able to conduct a modal test from start to finish. This training is about methodology & application. Modal theory is presented from the experimentalist's point of view. More than 800 engineers and technicians have attended this course and tested JimBeam since 1991. Have you?

Hands-On Laboratories

- Modal Measurements • Excitation Techniques Lab
- JimBeam Modal Test • Porsche Modal Test
- ODS Time & Frequency Domain Tests
- Laser Vibrometry (Single Point & Scanning) Lab
- Parameter Estimation Lab • Modal Pretest Lab
- Model Correlation Lab • FE Model Updating Lab

More than 800 engineers and technicians have tested the Navcon Porsche 916 which was retired in 2009. This will be the first class to conduct a modal test on the Navcon 911.
